

Ingredients, Allergens and Nutritional Information for Magic Breakfast Products

Magic Breakfast's aim first and foremost is to end hunger as a barrier to education through the provision of healthy breakfasts to school children. Our commitment to food safety is therefore a priority.

Due to the increase in awareness of food allergens and dietary allergies, it is essential that schools have the relevant information on the composition of the food supplied.

Below is a list of ingredients, allergens and advisory information relating to all Magic Breakfast food that may be supplied to your school. We will regularly update this document with any changes so please familiarise yourself with the information provided.

Occasionally substitutions to the regular products may be offered e.g. in the case of supplier shortages. **Please always check the individual packaging for allergens before offering to children with allergies, even if you have checked the brand name previously.**

Nutritional information is given in relation to Government food labelling guidance and School Food Standards (SFS). Key information is given for the amount of fat, saturated fat, sugar and salt per 100g, and is colour coded as follows (to encourage consumption of food lower in sugar, salt and saturated fat):

Green = low content (encouraged by SFS)

Orange = medium content (accepted by SFS)

Red = high content (not permitted by SFS)

Products that are classified as '**high fibre**' (more than 6g fibre per 100g) have also been highlighted in green text to highlight higher fibre options.
